ACR 2 Solutions Press Release

ACR 2 Solutions, Inc. partners with EHR manufacturer XLEMR

Lilburn, GA. July 12th, 210 - ACR2 Solutions, Inc., a leader in automated risk assessment and compliance reporting, today announced that it has signed an agreement with Marietta, GA based electronic health record (EHR) systems manufacturer XLEMR to sell ACR 2 Solutions risk assessment and HIPAA compliance products, including the *HIPAA Compliance Reporter* ™ family of products to their healthcare customers and related business associates. "We are pleased to partner with XLEMR and excited about the opportunity created for us by the stimulus funding requirement for a 45 CFR 164.308 compliant risk assessment in addition to ongoing HIPAA and other regulatory compliance mandates. The solution we deliver to the healthcare industry greatly assists them in meeting their information security compliance requirements at a fraction of previous costs", stated Jack Kolk, president of ACR 2 Solutions, Inc.

The partnership has immediate significance in that it allows XLEMR to offer one of the requirements for qualifying for the stimulus funds with their XLEMR offering to their customers. This requirement, to perform a security risk analysis in accordance with the HIPAA Security Rule, is one of the objectives that must be met when an eligible profession or clinic is applying for stimulus funds. The HIPAA Risk Reporter Basic™ is specifically designed to allow physicians and small clinics to meet this stage 1 requirement, while allowing for additional upgrades to meet full HIPAA and other compliance. "XLEMR is pleased to partner with ACR 2 Solutions in offering our clients state of the art compliance software. The ACR 2 products make it easy for customers to qualify for funding", said Tripp Weeks, president of XLEMR.
